

Packaging Presentation

KVJ Művek Zrt. Nagyvenyim

Short history of the company

- 1994. Year of foundation
- 1995. KVJ Művek became official supplier of MS Rt.
- 1995. Start of production parts to SWIFT
- 1996. ISO 9002:1994
- 1999. Official supplier of containers for WAGON R
- 2000. Start of production parts to WAGON R
- 2002. ISO 9001:2000
- 2003. Official supplier of containers for IGNIS
- 2003. Start of production parts to IGNIS

KVJ Művek Zrt. Nagyvenyim

Short history of the company

- 2004. Official supplier of containers for SWIFT
- 2004. Start of production parts to SWIFT
- 2004. ISO/TS 16949:2002
- 2005. ISO 14001:2004
- 2005. Official supplier of containers for SX4
- 2006. Start of production parts to SX4
- 2007. Official supplier of containers for SPLASH
- 2007. Start of production parts to SPLASH
- 2009. Official supplier of containers for new SWIFT
- 2010. Start of production parts to new SWIFT

KVJ Művek Zrt. Nagyvenyím

Key benefits

All racks can be custom made according to specifications.

These containers are specially developed storage containers that are suitable for the storage and transport of different industrial components.

They can be fitted one into another both in opened and closed state and in such manner the space utilisation can be optimised.

The containers can be handled by forklift and ensure that the elements are not damaged neither during the transport nor the storage.

KVJ Művek Zrt. Nagyvenyim

Key benefits

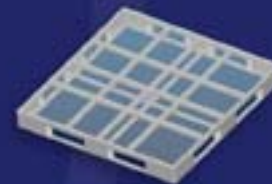

KVJ pallets work well in automotive, foundry, military, manufacturing, clean room, pharmaceutical and heavy industrial applications.

KVJ pallets can carry extremely heavy objects and are capable of withstanding rigors of tough environments.

No splinters, that's why metal works well in automated materials handling systems.

Various coatings are applied to protect and improve the life of metal pallets. Options include: powdercoats, wet paint, or galvanized coatings.

Packaging solutions can if required, be completed with plastic or wooden elements.

KVJ Művek Zrt. Nagyvenyím

Vision, Strategy

Growth

KVJ's primary focus is on organic growth through a more intense cultivation of established markets. Another important aspect of the growth strategy is also to follow multinational customers in their geographic expansions.

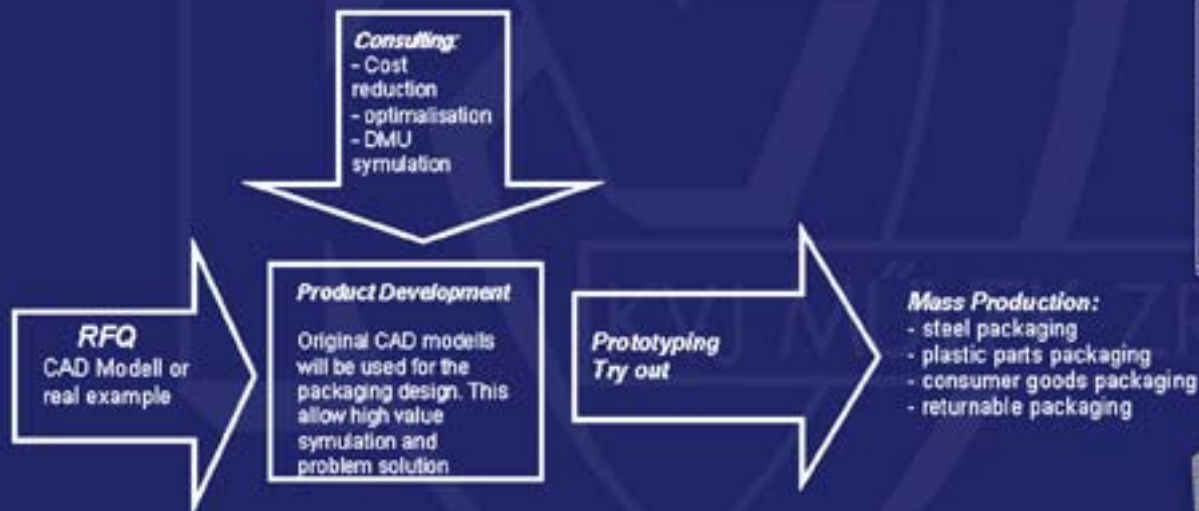

To strengthen the role as supplier of complete packaging solutions to selected market segments, the growth strategy includes co-operation with alliance partners, as well as acquisitions.

Process Workflow

KVJ Művek Zrt. Nagyvenyím Design

As part of the development process CAD-solutions offer a great opportunity to check the feasibility of a project by creating a virtual image of the expected solution. KVJ can provide you fully detailed designs for all your packaging needs.

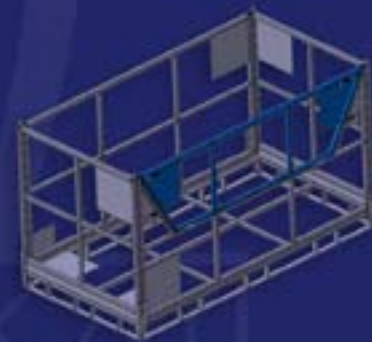

www.kvjmuvek.hu

KVJ Művek Zrt. Nagyvenyím Design

The CAD data of the part will be read into our CAD system
These data will be used to optimize the positioning of the
parts, critical distances and the ergonomical windows.
Results is a detailed virtual image of the packaging solution.
The benefit of a digital master product model is that it helps to
understand a product at an early design stage.

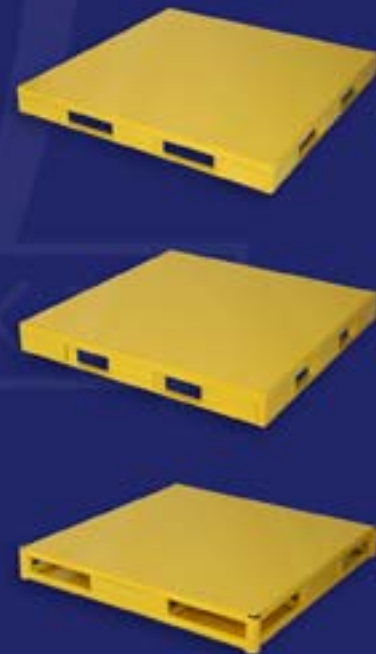

KVJ Művek Zrt. Nagyvenyím

Prototyping & production

Once the design has been perfected, and agreed a prototype will be built. These are made in our own die shop by our technicians using milling and turning machines. This affords us greater flexibility and ensures that deadlines are always met.

References

KVJ has many years of experience in the packaging systems. Our references include virtually all the big names from the industry:

Magyar Suzuki Corporation - design&serial production of all special packaging systems

Mercedes-Benz A Class - design&serial production of all packaging

AUDI,
Volkswagen,
Ford,
MAN,

TIER 1 suppliers:

Kirchhoff Automotive,
Tower Automotive, Matador Automotive,
Futaba, Kayaba, Gedia,
Tenneco Automotive, IAC Automotive,
ZF Hungaria, Videoton Holding,
Cascade Engineering Europe, ARRK,
Loranger, Gestamp, Arvin-Meritor,

KVJ Művek Zrt. Nagyvenyim

KVJ has more than 10 years of experience in creating containers pallets of automobile steel and plastic parts.

Plastic parts such as:

- Mirror
- Lamp
- Head lamp
- Condenser assy
- Silencer front hood
- Garnish assy cowl-top
- Air cleaner assy
- Box, floor console

Car body components such as:

- Panel hood
- Panel fender
- Panel roof
- Panel side body
- Panel door
- Panel dash
- Panel main floor
